

# Imagine...a Cure for Aging

Aubrey de Grey, a Cambridge biogerontologist, claims it will soon be possible for humans to end biological aging.

*Work to end the blight of involuntary death for all*

Countering the accumulation of cellular damage will prevent terminal diseases from ever manifesting.

If *Galapagos tortoises* enjoy negligible senescence and live over 200 years as healthy adults, *so can we*.

Discuss **calorie reduction**, **cryonics** & **nanomedicine** with us!

**Thursdays - 7p.m. - Watson Hall**
